

## Day 9

There are three types of CSS which are given below:

- **Inline CSS.**
- **Internal or Embedded CSS.**
- **External CSS.**

### **External CSS.**

External CSS contains the CSS property in another file.

\_It has the extension .css

Eg style.css

We call the file inside head using

```
<link href=" style.css " rel="stylesheet" type="text/css">
```

Sample code

Form.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <title>external Css</title>
  <!-- recall the external css -->
  <link href="stylesheet.css" rel="stylesheet" type="text/css">
</head>
<body>
  <form>
    <input type="email" class="form-input">
    <input type="password" class="form-input">
    <input type="submit" value="login" id="form-submit">
  </form>
</body>
</html>
```

### Styesheet.css

```
.form-input{  
  width: 400px;  
  height:60px;  
}  
#form-submit{  
  width: 200px;  
  height:60px;  
}
```
