

Day 6

CSS

CSS is the language we use to style an HTML document.

CSS stands for **Cascading Style Sheets**.

There are three types of CSS which are given below:

- Inline CSS.
- Internal or Embedded CSS.
- External CSS.

Inline CSS

Inline CSS contains the CSS property in the body section attached with element is known as inline CSS. This kind of style is specified within an HTML tag using the **style** attribute.

Rules of inline css

Style=";;;"

; separate style

: is stand for equally

px

In CSS We uses pixels in size, in images and others

Font-size:20px

Padding

Gives space inside inside the tag

- Padding-left
- Padding-right
- Padding-bottom
- Padding-top

Margin

Gives space outside the tag

- margin-left
- Margin-right
- margin-bottom
- margin-top

Span

Is used to design inline tag

`<p> hello there</p>`

Html

```
<html>
  <head>
    <title>Form</title>
  </head>
  <body style="background-color: rgb(70, 10, 210);">

    <h1 style="color:red;font-style: italic;padding-left: 100px;">here we
start</h1>

    <p style="font-size: 100px; font-weight: bolder; margin-top: 100px;">I'm Mr
Paragraph</p>
    <center>
      <p style="margin: 5px;letter-spacing:0px">
        <span style="color:#4285f4;font-size:100px;">G</span>
        <span style="color:#ea4335;font-size:100px;">o</span>
        <span style="color:#fbbc05;font-size:100px;">o</span>
        <span style="color:#5c96f6;font-size:100px;">g</span>
        <span style="color:#34a853;font-size:100px;">l</span>
        <span style="color:#ea4335;font-size:100px;">e</span>
      </p>
    </center>
    <center><input type="seacrh" placeholder="search here ..."
style="height:70px; width:600px;font-size: 30px;padding-left: 30px;border-
radius:50px;"></center>
```

```
</body>  
</html>
```

here we start

I'm Mr Paragraph
